

Universal Mounting Machine

«EL»

Universal mounting machine without adhesive applying system for the production of color cards with single, flat mounted color samples in conjunction with the glueing device Type AL. High precision thanks to direct taking out of samples from the magazine by the glued card. Simple application by pegged magazine elements for the formation of sample arrangement. Equipped with magazine tray, pegged elements and two-hand safety device.

- **Economical even for small batches.**
- **Suitable for any card format and pattern layout.**
- **Fast and simple set-up of swatch magazines by means of individually pegged elements.**
- **Safe, operated by two push-buttons.**
- **Low noise level.**

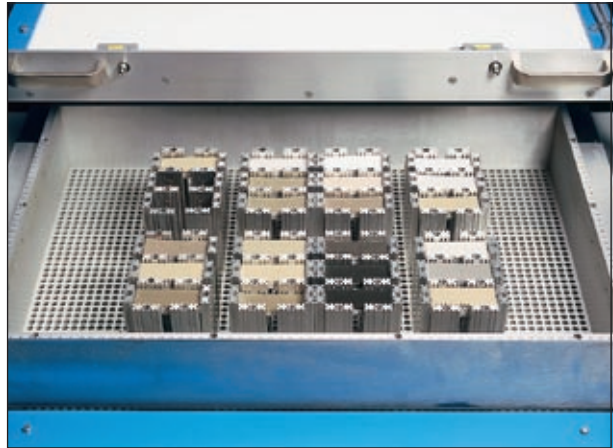

Technical Data

Card format	≤ 650 x 420 mm (≤ 25½" x 16½")	
Output per hour	≤ 250 cards	
Magazine height	100 mm (4")	
Dimensions	length	1300 mm (52")
	width	1160 mm (46")
	height	1030 mm (41")
Weight	310 kg (682lb.)	

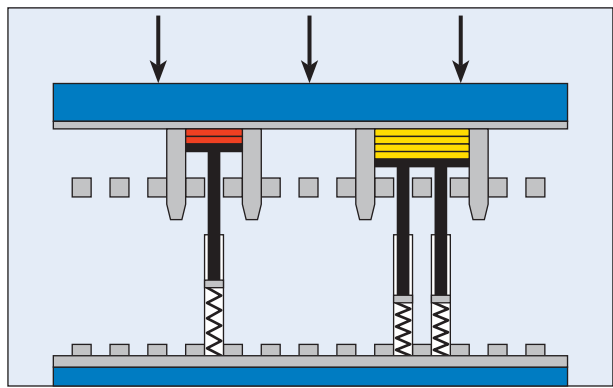

Subject to design changes

The principle

The pegboard-type perforation of the magazine tray serves to hold the magazine elements in their desired positions. Size and position of the magazines are a perfect match with the glue layout on the sample card.

Spring loaded pins press the sample piles against the glue coated areas of the card while the carriage performs his reciprocating stamping movement.

The mounted sample card is removed from the machine.
